

Patient Information

Chlamydia and N. Gonorrhoea Initial (First Pass) Urine Collection.

It is important that this collection is performed correctly.

- 1) You must not have passed any urine for at least 2 hours before collecting the sample of urine.
- 2) Collect about 20 mls of the **first part** of the urine directly into the container supplied. This is about half an inch of urine in the container. The rest of the urine passed can be discarded into the toilet.
- 3) Screw the lid firmly on the container.
- 4) Write your full name, date of birth, date of collection and time of collection on the container.
- 5) Take the specimen and request form given to you by your doctor to the nearest collection centre as soon as possible.
