Privacy Note

The information provided will be used to assess any Medicare benefit payable for the services rendered and to facilitate the proper administration of government health programs, and may be used to update enrolment records. Its collection is authorised by provisions of the Health Insurance Act 1973. The information may be disclosed to the Department of Health and Ageing or to a person in the medical practice associated with this claim, or as authorised/required by law.

Sensitive information is collected, stored, used and accessed with due regard for privacy in accordance with the 'Privacy Policy in Community Pathology' published by the Australian Association of Pathology Practices. A handout is available on request and you should have this explained to you.

Your doctor has recommended that you use Southern.IML Pathology. You are free to choose your own pathology provider. However, if your doctor has specified a particular pathologist on clinical grounds, a Medicare rebate will only be payable if that pathologist performs the service. You should discuss this with your doctor.

Hours may vary from Publication • We apologise for any inconvenience

Fasting Instructions for Patients

All Patients

All patients should continue taking medication as prescribed.

Non Diabetics (12hr fast)

Nothing to eat or drink (except water) for 12 hours prior to blood sample being taken.

Example: For an 8.00am collection the last meal must be 8.00pm the previous evening with NO breakfast or other food or drink (other than water).

Diabetics

Where there is strict dietary program this should be followed, and the blood collected so that the fasting period is as close to 12 hours as possible.

Example: If a light snack is normally taken at 10pm and breakfast at 8.30am the snack should be eaten as usual and blood collected just before 8.30am.

If on **Insulin** the blood collection should be arranged for just before the insulin dose and following meal.

How to Collect A MID STREAM URINE SPECIMEN (Male)

1. Where appropriate, pull back the foreskin.
2. Hold the container and the lid by the outside. Avoid touching the inside of either the lid or the container.
3. Commence urinating into the toilet.
4. Without stopping the flow of urine introduce the container into the flow of urine.
5. Half fill the jar with urine.
6. Finish urinating into the toilet.
7. Replace the lid on the container, secure tightly and return your specimen to the collector.

How to Collect A MID STREAM URINE SPECIMEN (Female)

1. Remove undergarments and sit on the toilet seat placing one knee as far to the side as possible.
2. Hold the container and the lid by the outside. Avoid touching the inside of either the lid or the container.
3. Commence urinating into the toilet.
4. Without stopping the flow of urine introduce the container into the flow of urine.
5. Half fill the jar with urine.
6. Finish urinating into the toilet.
7. Replace the lid on the container, secure tightly and return your specimen to the collector.
